

educational, and resource management functions as peers and partners with various persons, institutions and organizations. The no-action alternative would continue the present course of action for the monument, which would not meet the legislative mandate as it would provide only minimal research and education capabilities and no research center or museum. The minimum requirements alternative (alternative 1) would minimally meet the legislative mandate with most research and education functions completely dependent on sources from outside the National Park Service, and a research center and museum constructed and operated at a limited and superficial level.

Major resource impact topics that are analyzed for the proposed action and alternatives include natural and cultural resources, National Park Service programs, socioeconomics, facilities and infrastructure, access, and visitor experience.

The official responsible for a decision on the proposed action is the Field Director, Pacific West Area, National Park Service.

Dated: November 3, 1995.

William C. Walters,
*Deputy Field Director, Pacific West Area,
National Park Service.*

Notice Pursuant to Final Rules on Reading Rooms and Service to the Collections—Item Inspection Pilot Program

Notice is hereby given that, on November 27, 1995, in order to further secure the Library's collections, the Library of Congress will institute an Item Inspection Pilot Program. The Library will examine and record the condition of items from its high-risk collections before and after they are used by members of the public in the Library's reading rooms. The reader may be required to surrender his/her Library-issued User Card while using a particular high-risk item. The Library Police shall investigate instances when Library staff believe that the item may have been intentionally damaged by a reader. The Library will retain the records of the condition inspections in a file for security purposes.

The objective of this pilot program is to ensure that the Library's high-risk
